

Euro coin issuance plan

The main features of these coins, including their technical specifications (material, fineness, diameter, weight and mint quality), the descriptions of the obverse and the reverse, the nominal value and the date of release into circulation or start of sale will be timely published through the official channels of the Croatian National Bank. Due to the complexity and multidimensionality of the coin issuance procedure, the Croatian National Bank will not be able to disclose any precise information on the time of issuance and other details of individual issues prior to the official issuance announcement.

The Croatian National Bank retains the right to change and/or supplement the 2026 Euro Coins Issuance Plan. All changes come into effect upon their publication on the Croatian National Bank official website.

2025 Euro Coins Issuance Plan
